

ADVANCE CARE *IP*

Infrared Out-of-Bed Detector

The Advance Care Infrared Out-of-Bed Detector provides the ultimate in early detection of residents attempting to exit the bed.

Utilising infrared horizontal beam technology, the internal electronics are optimised to virtually eliminate false alarms.

It is most useful for residents who are at risk of falling out of bed, or those who require assistance exiting from bed.

A crucial addition in any facility's Dementia Care Management plan, when integrated with any Advance Care IP Nurse Call System, staff and management can specifically configure the Out-of-Bed Detector with a myriad of operation techniques. The Out-of-Bed Detector may also be configured to turn the lights on when the resident arises - a useful safety feature for those who are less mobile.

When the Out-of-Bed Detector senses movement, a high visibility reassurance light illuminates the 'CANCEL' button on the associated Call Button plate and the Call Button may also 'beep' periodically (if activated), providing reassurance to the user.

The Out-of-Bed Detector also has its own easily identifiable alert, such as 'Bed Exit Room 1'. This alert is also immediately displayed at the Nurse Station and sent to associated paging devices.

A unique feature of the Advance Care Out-of-Bed Detector, there are two visual indicators on the unit; the LED on the top indicates the status (ie. on or off) and an indicator on the front illuminates when the sensor detects movement.

This product integrates with most Nurse Call Systems via a 6.35mm Pendant Plug and is a valued addition to any Advance Care IP Nurse Call installation.

Features

- Unobtrusive
- Height adjustable
- Portable but sturdy
- Early Bed Exit detection
- Self standing or bed head mountable
- Light activation without leaving bed
- Two visual status indicators
- Reliable and accurate

Height Adjustable
800mm to 1500mm

6.35mm Pendant Plug

Code	Description
AC-IRB/SW	Infrared Out-of-Bed Detector with Switch (no stand)
AC-IRB/SS	Infrared Out-of-Bed Detector with Switch and Stand (as shown)

Design Specifications

Feature	Description
Height	800mm to 1500mm
Width	250mm (base)
Depth	250mm (base)
Weight	2590 grams
Connectors	6.35mm Stereo Phono Plug
Temperature	-20°C to 50°C
Humidity Range	0 to 90%

Compliance

Designed to comply with:

- AS/NZS 3811 Hard Wired Patient Alarm Systems
- AS/NZS 2999 Alarm Systems for the Elderly and Other Persons at Risk
- AS/ACIF S009 Installation Requirements for Customer Cabling
